

## CHARISMA

Charisma is a contemporary design that features a 1¼" cantilevered edge that projects 2". The top of the edge is flush with the worksurface and softened with a ¼" radius. The bottom of the edge is a gentle elliptical shape that forms the knife edge. This knife edge is mitered in all corners. Where return and bridge tops join desk and credenza worksurfaces, the edge is interrupted and continued with an inside mitered connection. The tops are supported by square cornered pedestals with a flush 2¾" high mitered hardwood base. This horizontal base is separated from the vertical side panel with an ⅛" recessed reveal. Where a pedestal is not present, there are vertical support panels that are 1¼" thick with square edges. The approach side of the desk has a stepped modesty panel, which allows visitor pull-up. The backs of credenzas are flush, finished and do not include the base detail. The finish on the pulls is polished chrome, or satin black. Black locks are standard on all drawers and are keyed alike by set-up.

This price list allows a certain amount of flexibility with the drawer storage components. The box-box-file pedestals (6-6-12) indicated with the letter A or C and the file-file (12-12) indicated with the letter B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price.

The overall dimensions indicated throughout this price list for each item include the projection of the top detail. When components are configured together to form larger assemblies, this projected detail is eliminated but the body of the unit remains the same. Therefore the overall combined dimension of a configuration will not be the sum of the single unit's dimensions. This assures a transition between components that is tight and free of gaps. In some cases duplicated panels may be eliminated for a cleaner appearance. Contact the factory for exact dimensions if overall size of a configured unit is required.

---

### **CHARISMA LE**

Charisma LE is an enhanced version of Charisma that incorporates the use of satin or polished metal accents and patterned glass hinged doors. The satin or polished metal finish on the 2½" high plinth bases allow the lower components to float above the floor. This base accent is applied to all Charisma LE products. Matching satin or polished metal top inlays are 3/16" wide and separate the 2" cantilevered edge from the veneer infield on all the 29" high top elements. The inlay creates an opportunity to select an optional veneer top of Birdseye Maple, Quartered Figured Anigre or Laurel Burl. Contact factory for pricing on the accent veneer tops.

Charisma LE also includes satin or polished metal enhanced door and drawer hardware. The standard drawer handle for box and file drawers is a 6" wide bowed handle. The lateral file drawers are accessed with a matching 8½" wide bowed handle. The tall storage doors utilize the same 8½" handle installed vertically. A 1" diameter ball pull is used on the smaller door and drawer components. The lock plugs on the Charisma LE product match the satin or polished metal finish of the metal accents. Optional wire exit grommets are available in separate Accessories price list, in matching metal finishes.

The upper storage components of the Charisma LE product have wood framed, patterned tempered glass hinged doors. The glass has a recessed 1/8" square pattern spaced on a 3/8" grid against a translucent matte background. These glass door enclosures can be accented with optional recessed lighting and glass adjustable shelving to provide display storage. See Accessories price list for pricing.
